

Year 3- UK Geographical places

Key Vocabulary

North, South, East, West	The four main directions on a compass.
Grid	The pattern made by horizontal and vertical lines on a map to help find the location of features.
Scale	This can be used to know how much smaller the map is than real life.
North arrow	This is there to help orientate the map the right way around.

A compass.

An example of a 'Bird's eye view' map.

This map shows the UK and the major cities. Capital cities are shown with a red dot.

This map shows the UK with just its natural hills and mountains. This shows different maps have different uses.
